Subject: IMA Fitness Testing

Good morning,

IAW AFI 10-248, para 1.25 and 6.5, IMAs are required to be tested under the Air Force Fitness Program. However, there is an AFRC supplement pending to the AFI that deals with retesting and administrative actions for IMAs who fail the test. **Until this supplement is published, all retesting and any administrative actions are on hold.** If you already have IMAs who have tested and failed, do not reschedule them but encourage them to continue to exercise on their own time. Once the supplement has been released, we will forward the info to you. If you have any questions, please contact the undersign. Thank you.
